

EB-5 Water Pressure Regulating Valve for Domestic Service

The Cash Acme EB-5 Regulators are an economical group of pressure reducing and regulating valves designed principally for household water supply service.

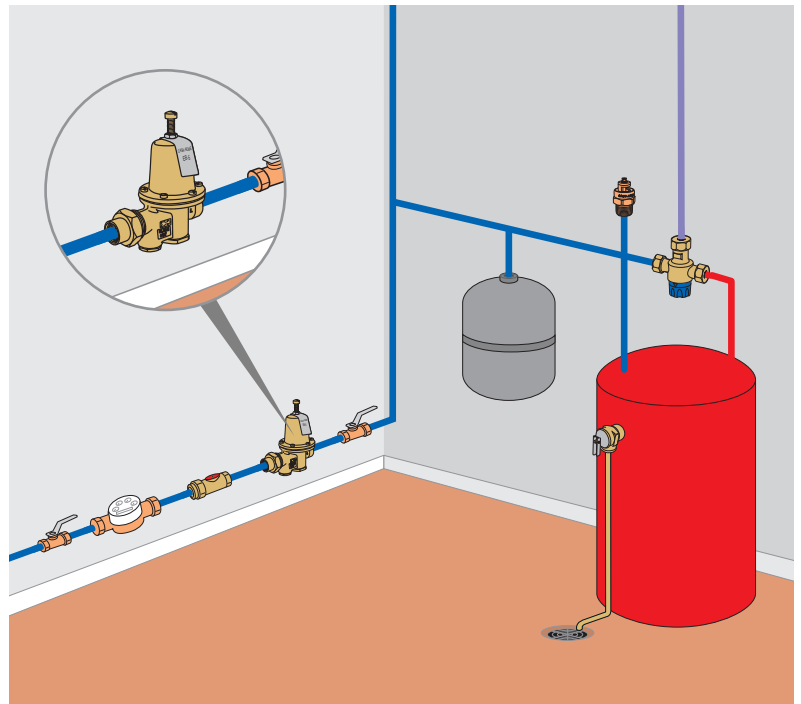

The Cash Acme EB-5 Regulators are available in sizes from 1/2" to 2-1/2". They are fitted with female threaded union inlet and female threaded outlet valve connections.

- Yoke Construction: *Provides tight shut-off.*
- Automatically reduces a high inlet pressure to a lower delivery pressure: *Maintains a lower pressure within reasonably close limits.*
- Listed by ASSE 1003, CSA and IAPMO: *Inspector friendly, peace of mind!*
- Every valve is tested for performance prior to shipping: *Specify and install with confidence!*

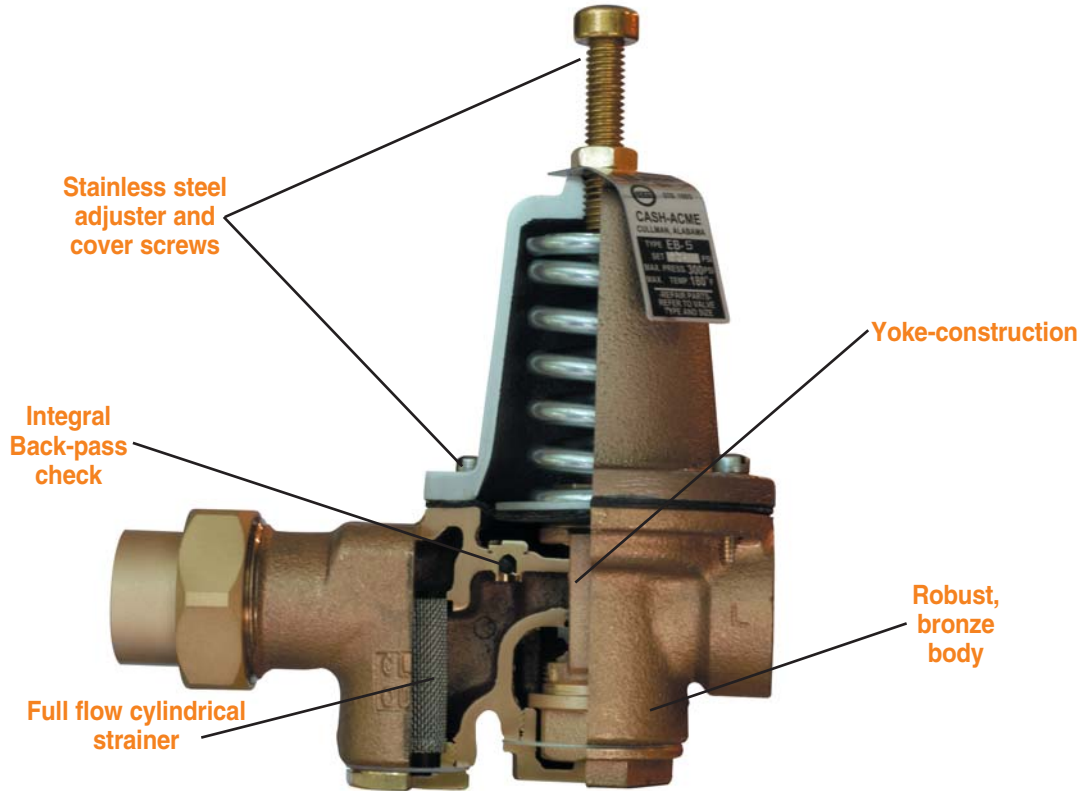

TYPICAL INSTALLATION

The EB-5 Regulators should be installed in the horizontal position with the spring chamber upright. For other installation requirements, consult the factory.
