

Cash Acme™

A-41 Pressure Regulating Boiler Feed Valve

The A-41 series pressure reducing boiler feed valve provides increased capacity for larger boilers. It has threaded female connections and an iron body with a polymer seat.

The Cash Acme A-41 Boiler Feed Valve features an iron body, inbuilt strainer, heat resistant diaphragm and seat disc. The A-41 is available in 3/4" female threaded connections only and provides increased capacity for larger boilers.

Approved Applications

Large hot water space heating boilers that require faster filling.

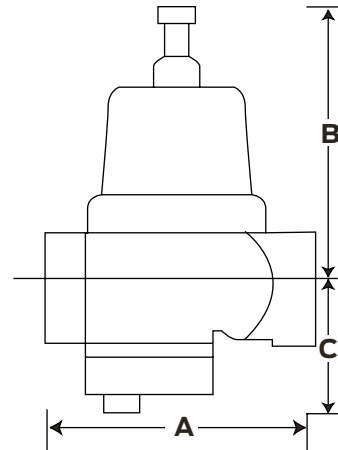

Specification Data

Performance

Factory Set	12 psi
Outlet Pressure Range	0-20 psi
Maximum Inlet Pressure	200 psi
Service	Non-Potable Water

Materials

Body	Iron
Strainer	Stainless Steel
Seat Disc	EPDM
Diaphragm	Nylon Reinforced EPDM

Dimensions (inches)

Size	Connection Style	Part #	A	B	C
3/4"	Threaded NPT	23099-0012	3-13/16	4-1/16	1-17/32
